

Transformation Governance Pack - Brochure

Intro

A practical transformation governance toolkit for programme sponsors, delivery leaders, enterprise architects and PMOs who need clear decision-making, RAID control and architecture governance without unnecessary bureaucracy.

Description

The Transformation Governance Pack provides ready-to-use templates for establishing disciplined but lightweight governance across complex change programmes.

Designed for ERP initiatives, cloud transformations, digital programmes, operating model change and architecture-led delivery, the pack helps teams define governance forums, clarify decision rights, manage risks and issues, capture architecture decisions, and track actions through to closure.

It combines steering group charters, RAID management, architecture decision records, meeting templates and governance tracking into a single practical package. The templates are designed to support both traditional and Agile delivery environments, helping teams maintain control while keeping delivery momentum.

Ideal For

- Transformation programmes
- ERP and SAP initiatives
- Cloud migration and modernisation
- Digital delivery programmes
- Architecture governance
- Steering group preparation
- PMO setup
- Programme assurance

ZIP Package Includes

- Steering Group Charter Template (.docx)
- Architecture Decision Record Template (.docx)
- Governance Meeting Pack Template (.docx)
- RAID Decision Action Tracker (.xlsx)
- Transformation Governance Pack Usage Guide (.pdf)

Key Outcomes

By using this pack, teams can:

- Establish clear governance forums
- Define decision rights and escalation routes
- Improve RAID visibility
- Capture architecture decisions properly
- Track actions and changes consistently
- Prepare more effective steering group meetings
- Reduce delivery ambiguity and governance noise
